

CHANGE IN DESCRIPTION AND CODE OF FINISHED PRODUCTS

From the end of 2020, our order confirmations will include important updates to the **description and codes of our finished products**. We therefore ask you to read the following communication carefully.

NEW FINISHED PRODUCT DESCRIPTION

The most important change is the one concerning the **"fluid" field**, which is unified regardless of the exchanger operation (explained in the technical data sheets), as shown in the following diagram:

W	units with single-phase liquid (water, water-glycol, oil, etc.)
H	units with HFC and HFO refrigerant gases
A	units with ammonia
C	units with CO ₂

EXAMPLE OF CREATION OF A NEW DESCRIPTION

BOREA W 50 2 C 4,5 A AC 04S

BOREA	model
W	type of fluid
50	Ø fan
2	n° fans

C	coil size
4,5	fin spacing
A	type of defrost
AC 04S	motor

SCIROCCO H 80 4.2 B 2,1 V AC 04D

SCIROCCO	model
H	type of fluid
80	Ø fan
4.2	n° fans

B	coil size
2,1	fin spacing
V	air flow
AC 04D	motor

Options and accessories are no longer visible in the description of the finished product, but only in FIELD 2 of the new code, as shown in the following paragraph "FINISHED PRODUCT CODE".

All catalogue or special options **are handled as technical attributes** and are explained in commercial offers and in the **documentation exchanged during the various stages of the order**.

The position of the connection side is also part of the technical attributes, so if no other information is given, the standard connection side is processed, as shown in the data sheet (right-hand side according to air flow).

To enable us to process your order correctly, it is essential that you always send us the reference **data sheet** generated by the software. If, on the other hand, the new code has already been handled, you can forward the order with the new code.

NEW FINISHED PRODUCT CODE

The new **Stefani code** consists of 12 digits and is divided into 4 fields:

FIELD 1		FIELD 2		FIELD 3		FIELD 4
1M	Ventilated finished product	01	Standard catalogue product, e.g. air or electric defrosted units or horizontal/vertical air flow condensers/dry coolers, software fans.	001	Commercial air cooler	Progressive number
1B	Finned pack coil product	02	Configured catalogue product, multi selection of accessories envisaged by software, ventilation by software	002	Industrial air cooler	
1K	Accompanying kit	03	Configured catalogue product with special accessories not envisaged by the software, special ventilations	003	Commercial condenser	
		04	Special product not related to one in the catalogue	004	Industrial condenser	
		05	Customised special product	005	Commercial Dry cooler	
				100	Industrial Dry cooler	

EXAMPLE 1M 02 005 00001

1M	Machine finished product
02	Catalogue product with multiple selection of accessories envisaged by software

005	Commercial condenser
00001	Progressive number

The selection software **will present the described updates** as from 1 February 2021: any form generated with the previous description system will therefore be obligatorily recoded and described according to the new systems.
